

WETTING AGENTS

ENGAGE

FROM EAST RIDING HORTICULTURE

With over 30 years' experience in Amenity Turf here at East Riding Horticulture we pride ourselves on offering quality products with the knowledge of how to use them, ensuring you receive the right product at a competitive price.

The Engage range from East Riding Horticulture is designed for quality turf areas, providing outstanding control over your moisture management. We offer a complete range of residuals, penetrants, hose-end pellet and irrigation tank tablets. Using only the highest quality raw materials, our offering in this area is second to none.

ENGAGE ACCELERATE

ENGAGE ACCELERATE is a highly optimised and long lasting dew dispersant that gives an extended effect. Rapid removal of rain, dew and guttation fluid leads to drier sward which can significantly reduce the potential for fungal turf diseases as well as aid playability of putting surfaces. Less labour time required to switch the greens dry on a morning.

- HIGHLY OPTIMISED AND LONG LASTING DEW DISPERSANT
- OPTIMISES WATER PENETRATION
- PENETRATIVE AND CURATIVE EFFECT
- ACCELERATES INFILTRATION OF WATER
- REDUCES STANDING WATER
- HELPS CREATE A MORE EVEN PLAYING SURFACE
- AVAILABLE AS 5 LITRE PACK

Engage Accelerate Application

For best results apply as a standalone spray onto dry turf.
Can be used mid-August till end of spring.
Do not apply immediately ahead of heavy rain.

Zone:	Greens/Tees/Sports Pitches	Zone:	Bowling Greens
Size:	5 litres	Size:	750ml
Water Volume:	300-450 litres	Water Volume:	45-68 litres
Area:	1 hectare	Area:	1500m ²
Frequency:	Every 10 to 21 days as required	Frequency:	Every 10 to 21 days as required

ENGAGE ORIGINAL

ENGAGE ORIGINAL is a 100% active, non-ionic standard block co-polymer wetting agent developed for use on amenity grass, specifically golf greens and tees, to help prevent the occurrence of localised dry patch (LDP) and thus maximise grass health. Engage Original a high quality product giving reliable performance at an exceptional price.

- TREATMENT AND PREVENTATIVE FOR LOCALISED DRY PATCH
- NON-SCORCH FORMULA
- READILY BIODEGRADABLE
- EXCELLENT TANK MIX COMPATIBILITY
- POTENTIAL TO REDUCE WATER CONSUMPTION
- HELPS CREATE A MORE EVEN PLAYING SURFACE
- AVAILABLE AS 5/20/120/200 LITRE PACKS AND 1000 LITRE (IBC)

Engage Original Application

Should be added to water rather than water added to Engage Original.
Water in within 24/48 hours and before cutting.
Monthly application - March/April until September/October.

Zone:	Greens/Tees/Sports Pitches	Zone:	Bowling Greens
Size:	20 litres (15-20 litres on Fairways)	Size:	3 litres
Water Volume:	300-600 litres	Water Volume:	45-90 litres
Area:	1 hectare	Area:	1500m ²
Frequency:	Monthly	Frequency:	Monthly

ENGAGE PREMIUM

ENGAGE PREMIUM is a 100% active, non-ionic reverse block co-polymer wetting agent developed for use on amenity grass, specifically golf greens and tees, to help prevent the occurrence of localised dry patch (LDP) and thus maximise grass health. Carefully engineered for maximum performance giving long residence time and a highly effective wetting action.

- TREATMENT AND PREVENTATIVE FOR LOCALISED DRY PATCH
- NON-SCORCH FORMULA
- CONTAINS A SPECIAL SURFACTANT TO AID THE INITIAL SPREAD INTO THE ROOTZONE
- EXCELLENT TANK MIX COMPATIBILITY
- POTENTIAL TO REDUCE WATER CONSUMPTION
- HELPS CREATE A MORE EVEN PLAYING SURFACE
- AVAILABLE AS 5/20/120/200 LITRE PACKS AND 1000 LITRE (IBC)

Engage Premium Application

Should be added to water rather than water added to Engage Premium.

Water in within 24/48 hours and before cutting.

Monthly application – March/April until September/October.

Zone:	Greens/Tees/Sports Pitches	Zone:	Bowling Greens
Size:	20 litres (10-20 litres on Fairways)	Size:	1.5-3 litres
Water Volume:	300-600 litres	Water Volume:	45-135 litres
Area:	1 hectare	Area:	1500m ²
Frequency:	Monthly (or 90 days, please enquire)	Frequency:	Monthly (or 90 days, please enquire)

ENGAGE FORCE

ENGAGE FORCE is a penetrant and curative wetting agent for localised dry patch. Powerful blend of surfactants that aids water infiltration and can emulsify hydrophobic materials which can then be removed with a strong water flush. Can be used cost effectively on non-irrigated fairways by application ahead of pending rainfall.

- PENETRANT AND CURATIVE EFFECT
- STRONGLY AIDS INFILTRATION OF WATER
- MAY REDUCE LOCALISED WATER-LOGGING
- REDUCES RUN OFF
- CURATIVE ACTION FOR LOCALISED TREATMENT
- HELPS CREATE A MORE EVEN PLAYING SURFACE
- AVAILABLE AS 5/20/120/200 LITRE PACKS

Engage Force Application

Use year round to ensure the best penetration of water into the soil profile, assisting in the uptake of water from the surface.

Water in within 24/48 hours.

Zone:	Greens/Tees/Sports Pitches	Zone:	Bowling Greens
Size:	1-3 litres (1-3 litres on Fairways)	Size:	150-450ml
Water Volume:	300-900 litres	Water Volume:	45-135 litres
Area:	1 hectare	Area:	1500m ²
Frequency:	All year round	Frequency:	All year round

ENGAGE FAIRWAY PLUS

ENGAGE FAIRWAY PLUS is a highly concentrated ethoxylated siloxane based wetting agent developed for use on amenity grass, in particular Fairways. Engage Fairway Plus boasts low application rates whilst providing effective wetting within the rootzone and reduced water run-off. Provides a highly effective and long lasting dew dispersal effect which reduces fungal disease pressure.

- PENETRANT AND CURATIVE EFFECT
- STRONGLY AIDS INFILTRATION OF WATER
- POWERFUL PENETRANT PROPERTIES
- REDUCES RUN OFF
- EFFECTIVE, LONG LASTING DEW DISPERSANT
- HELPS CREATE A MORE EVEN PLAYING SURFACE
- AVAILABLE AS 1 AND 5 LITRE PACKS

Engage Fairway Plus Application

When using as a wetting agent, water in within 24/48 hours and before cutting. Apply monthly or less frequently as required but not exceeding 3 litres per hectare or applying more frequently than fortnightly.

Zone:	Greens/Tees/Sports Pitches	Zone:	Bowling Greens
Size:	1-2.5 litres (1 litre on Fairways)	Size:	150-375ml
Water Volume:	150-900 litres	Water Volume:	22-135 litres
Area:	1 hectare	Area:	1500m ²
Frequency:	Monthly	Frequency:	Monthly

ENGAGE DEWGO

ENGAGE DEWGO is formulated from top quality raw materials. Highly effective and long lasting dew dispersant gives over 3 weeks of dew dispersancy under ideal conditions. 100% active with no diluents or carrier solvents and oils. Highly concentrated blend of surfactants designed to control dew formation on amenity grass.

- SUPPRESSES DEW FORMATION AND THUS SWARD PROBLEMS EXACERBATED BY EXCESS MOISTURE
- FASTER DRYING TIMES FOLLOWING RAINFALL
- ALLOWS GOLFERS AN EARLY START
- SAVES TIME COMPARED TO TRADITIONAL SWITCHING AND BRUSHING
- HELPS CREATE A MORE EVEN PLAYING SURFACE
- AVAILABLE AS 1/5/20 LITRE PACKS

Engage DewGo Application

Apply as required, but not more often than weekly. Must be diluted in water prior to application. Ensure sufficient mixing before spraying.

Zone:	Greens	Zone:	Bowling Greens
Size:	6 litres	Size:	900ml
Water Volume:	300-400 litres	Water Volume:	45-60 litres
Area:	1 hectare	Area:	1500m ²
Frequency:	As required	Frequency:	As required

ENGAGE MINI PELLETS

ENGAGE MINI PELLETS are a unique 100% active, block co polymer wetting agent pellet with very low scorch potential for use in hose end applicators. Engage MEGA pellets will reduce the surface tension, thus increasing wetting capability of water applied to areas most susceptible to dry patch such as bunker edges.

- EFFECTIVE WETTING PERFORMANCE
- VERY LOW SCORCH POTENTIAL
- WATER SOLUBLE BAG ENSURES EASY REMOVAL FROM POT
- PELLETS DISSOLVE UNIFORMLY AND DO NOT BREAK-UP OR DISINTEGRATE
- 100% SURFACTANT FORMULATION WITH NO USE OF BINDERS OR DILUENTS
- PELLET DIMENSIONS – 55MM (DIAMETER) X 80MM (HEIGHT)
- AVAILABLE AS 6X 250G PELLET

Engage Mini Pellet Application

Engage Mini Pellets dissolve slowly as water passes over them reducing surface tension of applied water and thus increasing its wetting power. Pellets, complete with water soluble bag, should be removed from the pot before use and placed into the hose end applicator. Water greens, tees and hot spots as required. One tablet will treat up to 6-7 greens.

ENGAGE MEGA TABLET

ENGAGE MEGA TABLET is a 3kg tablet for addition to irrigation tanks. The tablet will dissolve slowly and uniformly, reducing the surface tension of the water applied through the irrigation system. Tablets are supplied with a mesh bag which can be used to hang the tablets near to inlet or outlet pipes. Putting tablets closer to the water flow will result in quicker dissolution and more effective surface tension reduction. Tablets can be placed further from any water flow if slower dissolution is required.

- INCREASES THE WETTING POWER OF IRRIGATION WATER
- TABLET DISSOLVE UNIFORMLY AND DO NOT BREAK UP OR DISINTEGRATE
- 100% SURFACTANT TABLET – NO BINDERS
- MILD SYSTEM CLEANING EFFECT
- PACKED IN A WATER SOLUBLE BAG FOR EASE OF REMOVAL FROM PAIL
- AVAILABLE AS 3KG TABLETS

Engage Mega Tablet Application

The tablet should be removed from the plastic pail (complete with water soluble bag). Tablet (including water soluble bag) can be placed in the supplied mesh bag and hung in the irrigation tank (such that the mesh Engage Mega Tablet bag can be retrieved at a future date) or may be dropped loose to the bottom of the tank. For larger tanks and bigger irrigation volumes it will become more necessary to increase the dissolution rate and/or number of tablets employed.

IRRIGATION
systems & control

FROM EAST RIDING
HORTICULTURE

Here at East Riding Horticulture we provide a comprehensive range of fully automatic and manually operated irrigation systems, everything from hosepipes to sprinklers of all shapes and sizes for sports turf, golf courses to landscape watering.

Sports Turf Irrigation

Irrigation is an important and integral part of sport turf grass management. We offer multiple applications to suit different sport turfs and surfaces.

Sports Turf and Surfaces

Travelling sprinkler irrigation systems
Automatic watering systems
Permanent watering systems
Pop-up sports sprinklers
Rain guns and hoses
Automated irrigation controllers

Facilities

Golf courses
Grass Tennis court
Bowling lawns
Football and Rugby pitches
Cricket squares and outfields
Racecourses & Polo fields

Benefits

Plant growth and survival
Soil formation and strength
Minimise plant stress
Chemical transport
Managing playability
Maintaining presentation

Irrigation is essential for a maintaining soil/water balance. By automating water rotation among different facilities, you can minimise turf stress while maximising growth, as well as save water, time and cost. Every field is different, so it's important to consider how the soil texture, local weather and the actual usage of the field will affect the chosen irrigation system.

We can supply a comprehensive range of systems, parts and fittings to suit your requirements.
