

## NEXT GENERATION BIO-NUTRITIONAL

Promoting Optimal Soil and Plant Health

Attain, powered by AquaVita™ Technology is a highly refined proprietary bio-nutritional formulation containing both compost and kelp solution bio-extracts.

Specifically designed for professional turf managers, Attain is the future of organics, derived from natural sources. This unique bio-extraction process promotes optimal plant and soil health for all turf types, including greens, tees, fairways, and sports turf.

Attain maximises the benefit of existing nutritional elements and supports consistent and sustainable root growth.

### KEY BENEFITS

Promotes optimal plant and soil health for all turf types

Improved presentation with minimal inputs (1kg N and 0.4kg Fe / Ha)

Maximises the benefit of existing nutritional elements

Extended Longevity

Supports consistent and sustainable root growth

# SPECIFICALLY DESIGNED FOR PROFESSIONAL TURF MANAGERS AND POWERED BY AQUAVITA TECHNOLOGY

AquaVita™ Technology is a platform of proprietary technologies, resulting from an advanced bio-extraction process and designed to aid turf care professionals in optimising nutritional efficiency in their turf. Each adaptation of the AquaVita™ Technology is specifically developed and paired with a unique blend of proven soil surfactant chemistry to address the specific needs of the targeted turf area.

Attain - Key Features	
Concentrated use rate	Logistics handling and transport benefits
Improved odour	More appealing to handle
Superior formulation	Flowability of product
Free-flowing, clear appearance	End-user ease of use
Packed full of secondary metabolites	More active formulation than one that purely increases beneficial bacteria and fungi

ProFacts	
<b>WHAT IT DOES:</b>	Attain maximises the benefit of existing nutritional elements and supports consistent and sustainable root growth.
<b>HOW TO USE:</b>	Apply on a monthly basis as part of an overall turf management programme.
<b>USE RATE:</b>	<ul style="list-style-type: none"> <li>• 10 L per hectare.</li> <li>• Apply in enough finished volume to ensure adequate coverage, typically 300 to 600 L per hectare.</li> </ul>
<b>WHERE TO USE:</b>	Safe to use on all professional turf types including greens, tees, fairways, and sports turf.
<b>BEST PRACTICES:</b>	<ul style="list-style-type: none"> <li>• Attain should receive irrigation or rainfall before removing clippings.</li> <li>• Prior to tank mixing Attain with other products, conduct a jar test to ensure compatibility.</li> </ul>

PRODUCT MAKE-UP	
CONTAINS NONPLANT FOOD INGREDIENTS:	
Compost solution bioextract .....	50%
Kelp solution bioextract (microbe food) .....	5%
Polyethylene-polypropylene glycol .....	2.5%
Alkyl polyglycoside .....	2.5%
Total Nitrogen (N).....	.8%
Iron (Fe).....	.3%
