Water-proof
Environmentally-friendly
FSC-approved cardboard

ECO EARTH TREE SHELTER

Our Eco Earth Tree Shelters (sapling protectors) are an environmentally-friendly alternative to the traditional plastic products used to protect young trees.

Made from a water-resistant board, which has been coated to give it additional protection. Designed to last outside, for at least 3 years, before eventually disintegrating, this makes them the perfect alternative to plastic tree shelters. Suitable for composting or recycling. Supplied as standard in green, flat, for easy and cost-effective transportation

Available in four sizes: 60cm; 70cm; 120cm and 150cm

Talk to your local East Riding Horticulture Area Manager about our Eco Earth Tree Shelters or call our head office on 01904 608157.
