

ShakerPro

Hand held applicator

The ShakerPro spreader is the ideal tool for efficiently applying fertilisers and seeds to small areas, making it particularly valuable for divot repairing.

The adjustable dial openings enable precise control over material sizes, accommodating a range of granular products. Moreover, its ergonomic grip handle ensures a comfortable fit in your hand, allowing ease of use.

Using the ShakerPro is a breeze. Just pour in the product, twist to lock, spread evenly, and then securely store it after use. This user-friendly device simplifies the process of distributing various granular substances with remarkable efficiency.

Key benefits

- Ideal for divot repairing
- Easy to use
- Made from sturdy, quality materials
- Spreads fertilisers, seeds and granular wetting agents
